

## FIPS5 Series Power Supply

The FIPS5 power supply is a regulated, linear power supply rated at 5 Amps @ 24VDC. It's state-of-the-art, solid-state design offers a flexible and cost effective solution to powering and controlling low current DC locking devices such as mortise locks, cylindrical locks, panic trim, and electric strikes.

This gives the installer the flexibility to control low current and high surge current devices together with one power supply.

The unit offers a continuous 27.6V battery charging circuit while allowing adjustable output voltage (24-27VDC). The PS5 is available in 4, 6, and 8 I/O models to accommodate most field conditions you might encounter. Housed in an attractive, high-quality enclosure, the PS5 series will be a complement to your installation while offering value not found elsewhere.
